## About XTRA Tech

XTRA Tech is a media and ICT company that helps businesses build their brands. We offer website design services, custom email addresses, digital advertising services, social media management and many more.

## What We Do

We provide a wide range of media and ICT services including but not limited to designing logos, designing websites, setting up and managing custom email addresses, designing ad creatives and running digital ads on our website and across other platforms, brand management, social media management, ICT consultancy, and photo and video editing. We also sell tech products from smartphones and storage devices to power banks.

## What We Do Best

The list of what we do is very long but our core business is website design and setting up and managing custom email addresses.

### Website Design

We build beautiful, interactive, modern and mobile-friendly websites for a range of customers. Our client list include Dee Pee Investment (construction), Agape Outreach Ministries (Church), Think Solution SL (advocacy), DAWN International School (education) and XTRA Tech (ICT company). Yes, we designed our own website! What type of website designer would we be if someone else designed our site.

Our lead website designers are Wix Experts with Wix Certifications.

### Custom Email Addresses

Most of our clients also request custom email addresses. We help them register their domain (e.g. biz.com), connect their website to their domain (e.g. [www.biz.com](http://www.biz.com)), and set up custom email addresses on the same domain (e.g. [info@biz.com](mailto:info@biz.com), [sales@biz.com](mailto:sales@biz.com))
